Subject: 2019EA000868 (Editor - Peter Fox): Decision Letter

Message: Dear Dr. Schouw:

Thank you for submitting your manuscript entitled "Jetwash-induced vortices and climate change" [Paper #2019EA000868] to Earth and Space Science. Your manuscript may be suitable for publication after a compliant data statement and relevant data citations have been added.

As of August 1, 2019, AGU is adhering to the common Enabling FAIR data Project guidelines, which specify that by acceptance new data for the paper should be placed into community data repositories (not only in supplements). If you are unsure where your data should be deposited, please see the following page for guidance:

<https://www.agu.org/Publish-with-AGU/Publish/Author-Resources/Data-for-Authors>

An explicit statement is required in the Acknowledgments section describing where users can access or find the data for this paper. The statement should include the repository where the data are preserved and any access requirements or fees. Citations to archived data should be included in your reference list and all references, including those cited in the supplement, should be included in the main reference list. If you have questions about these recommendations, please contact the journal inbox. Statements to the effect of "data available from authors" are not acceptable.

Please add a data statement that complies with AGU publication data policies.

Please submit a revised manuscript that responds to or addresses the comments by December 17, 2019.

In your revision, please follow our [Checklist](https://www2.agu.org/Publish-with-AGU/Publish/Author-Resources/Revisions-Resubmission-Checklist) and use our [Templates](https://www2.agu.org/Publish-with-AGU/Publish/#1) for the main file and any supporting information.

Please provide the following:

1. The revised manuscript with the changes incorporated and separate figure files (figure parts should be combined into a single file), which will be used for publication if the manuscript is accepted. If final figures are already uploaded, they can be easily copied over to the next revision version.
2. If any, supporting information text figures, captions, and small tables in a single PDF file using AGU's template. Large data tables, and multimedia should

be uploaded separately in their native format (preferably .xlsx or .csv for tables).

All listed references must be available to the general reader by the time of acceptance. AGU [requires](https://eos.org/agu-news/agu-opens-its-journals-to-author-identifiers) the corresponding author, and encourages all authors, to register for an [ORCID](https://orcid.org/).

Please check and verify authorship, and that all authors are included, have approved the revisions, and agreed to be listed in the order given. Responsibilities of the corresponding author are given [here](http://publications.agu.org/author-resource-center/text-requirements/).

When you are ready to submit your revision, please login to your account (<https://earthandspace-science-submit.agu.org/cgi-bin/main.plex>) and click "Revise 2019EA000868."

I look forward to receiving your revised manuscript. If you have any questions, or need additional time to complete your revisions, please contact us at earthspacescience@agu.org.

Yours sincerely,

Peter Fox
Editor
Earth and Space Science

-----IMPORTANT INFORMATION-----

Additional information on text preparation, formatting, acceptable file formats, supporting information, graphics preparation, and AGU style, is [here](https://www2.agu.org/en/Publish-with-AGU/Publish/Author-Resources/Text-requirements). AGU has recently [updated](https://www2.agu.org/Publish-with-AGU/Publish/Author-Resources/Grammar-Style-Guide#referenceformat) its styles.

Sharing your work is an important part of the research process, and AGU leverages and shares published research to promote the broader importance of Earth and space science. Learn how you can [promote your paper](https://www2.agu.org/Share-and-Advocate/Share/News-media/Publicize-your-science), including how your paper can be considered for additional publicity or for the issue cover.

If any reviewers made annotations to the pdf, there will be a link to the pdf.
