

Magnetic Resonance in Medicine Template

Alberto Pepe¹

¹Authorea Team

Abstract

Purpose: Please insert here the purpose of the study.

Methods: Please insert here the methods of the study.

Results: Please insert here the results of the study.

Conclusion: Please insert here the conclusions of the study.

1 First Level Heading

Please lay out your article using the section headings and example objects below, and remember to delete all help text prior to submitting your article to the journal.

Figure 1: **Please replace this figure.** Although we encourage authors to send us the highest-quality figures possible, for peer-review purposes we are can accept a wide variety of formats, sizes, and resolutions. Legends should be concise but comprehensive – the figure and its legend must be understandable without reference to the text. Include definitions of any symbols used and define/explain all abbreviations and units of measurement.

1.1 Second Level Heading

If data, scripts or other artefacts used to generate the analyses presented in the article are available via a publicly available data repository, please include a reference to the location of the material within the article.

1.2 LaTeX and Mathematical notation

You can also include LaTeX code in your documents. Here is a simple inline equation $e^{i\pi} = -1$ and here's a longer equation, numbered:

$$\int_0^{+\infty} e^{-x^2} dx = \frac{\sqrt{\pi}}{2} \quad (1)$$

1.3 Adding Citations and a References List

You can cite bibliographic entries easily in Authorea. For example, here are a couple of citations ^{1,2}. By default citations are formatted according to a format accepted by the journal. Here is one more citation ³

1.4 Customizing the exported PDF

You can add packages, create aliases and macros (newcommands), as well as specify corresponding address, corresponding email, funding information etc by clicking “Settings”, “Edit Macros”.

The significant problems we have cannot be solved at the same level of thinking with which we created them.

Measurements should be given in SI or SI-derived units. Chemical substances should be referred to by the generic name only. Trade names should not be used. Drugs should be referred to by their generic names. If proprietary drugs have been used in the study, refer to these by their generic name, mentioning the proprietary name, and the name and location of the manufacturer, in parentheses.

Variables	JKL1 (n=30)	Control (n=40)	MN2	t (68)
Age at testing	38	58	504.48	58 ms
Age at testing	38	58	504.48	58 ms
Age at testing	38	58	504.48	58 ms
Age at testing	38	58	504.48	58 ms
Age at testing	38	58	504.48	58 ms
Age at testing	38	58	504.48	58 ms

Table 1: This is a table. Tables should be self-contained and complement, but not duplicate, information contained in the text. They should be not be provided as images. Legends should be concise but comprehensive – the table, legend and footnotes must be understandable without reference to the text.

2 Acknowledgements

Acknowledgements should include contributions from anyone who does not meet the criteria for authorship (for example, to recognize contributions from people who provided technical help, collation of data, writing assistance, acquisition of funding, or a department chairperson who provided general support), as well as any funding or other support information.

3 Conflict of interest

You may be asked to provide a conflict of interest statement during the submission process. Please check the journal’s author guidelines for details on what to include in this section. Please ensure you liaise with all co-authors to confirm agreement with the final statement.

4 Supplementary information

Supporting information will be included with the published article. Please supply all supporting information as separate files but insert the captions in the text, here at the bottom of the document.
