

Table 1.

	BCVA(LogMAR)	IOP(mmHg)	ECC(/mm <sup>2</sup> )
before surgery	1.3±0.7	13.3±2.3	2782±558
6 months after surgery	0.91±0.88	17.5±4.7	2243±717
P	0.003	0.000	0.000

Comparison of ocular parameters before and after operation: The BCVA improved a little, the IOP was higher and the corneal ECC was less. There were statistically significant differences( $P<0.05$ ).
