

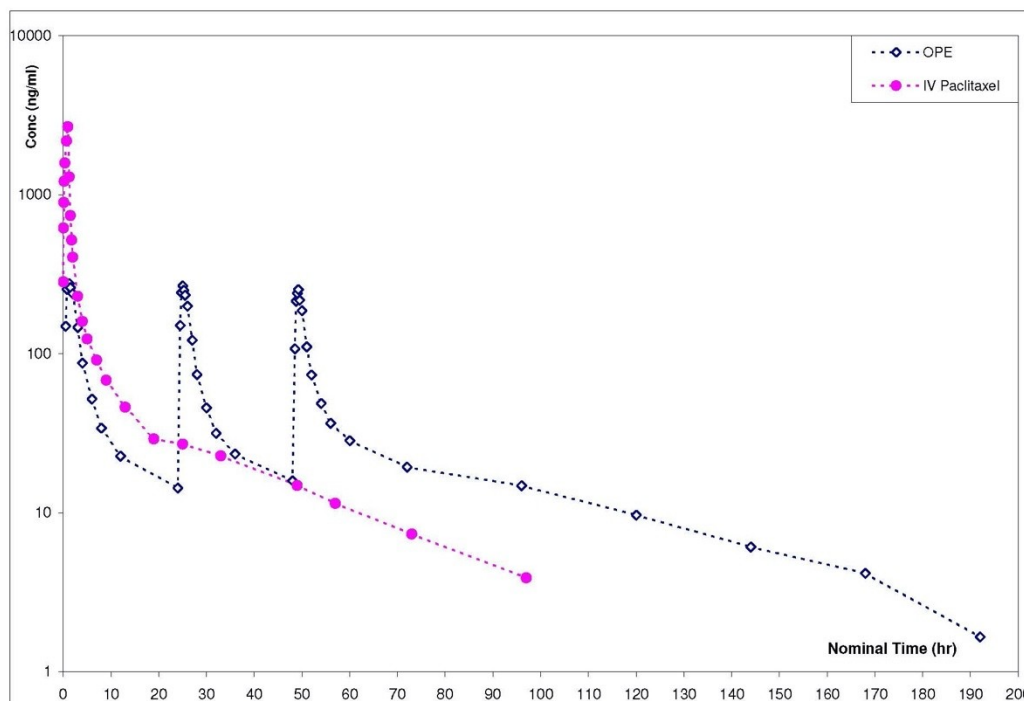

Figure 2. Mean (\pm SD) Paclitaxel Plasma Concentration-Time Profiles Following Oral and IV Paclitaxel Administrations (PK Analysis Set, n=35)

Note: The PK Analysis Set includes 35 subjects with complete PK profiles for both oral and IV paclitaxel.

OPE = Oral Paclitaxel 205 mg/m² + Encequidar 15 mg

BE = bioequivalence; Conc = concentration; hr = hour; IV = intravenous.
