

**Table 2. Different indications for risk-stratified adjuvant treatment**

<b>Histopathological risk factor</b>	<b>No adjuvant treatment</b>	<b>Adjuvant chemotherapy</b>	<b>Adjuvant chemotherapy and radiotherapy</b>
Focal choroidal invasion (IRSS I, C1)	22 (84.6%)	4 (15.4%)	0
Massive choroidal invasion (IRSS I, C2)	4 (15.4%)	22 (84.6%)	0
Scleral invasion (IRSS I, S1)	3 (11.5%)	21 (80.8%)	2 (7.7%)
Transscleral extension (IRSS II, S2)	1 (3.9%)	16 (61.5%)	9 (34.6%)
Prelaminar optic nerve invasion (IRSS I, N1)	21 (80.8%)	4 (15.4%)	1 (3.9%)
Postlaminar optic nerve (IRSS I, N2)	2 (7.7%)	21 (80.8%)	3 (11.5%)
Resection margin of the optic nerve (IRSS II, N3)	0	5 (19.2%)	21 (80.8%)
<b>Further risk factors highlighted by centres</b>			
Anterior chamber or anterior segment (definition of risk factors in anterior segment varies)		18 (69.2%)	
Combination of prelaminar optic nerve invasion and focal choroidal invasion		8 (30.8%)
