

**Table 4. Overall Survival of patients with histopathological risk factors**

Risk stratification	Type of histopathological risk factors	Germany and Austria <sup>18</sup>		France SIOF abstract RB SFCE 09		France <sup>11</sup>	
Study design		retrospective		prospective		prospective	
Years of recruitment		1997-2009		2010-2018		2001-2007	
Outcome parameter		Patient number	5 year-OS	Patient number	1-year-OS	Patient number	5-year-OS
Low risk	minimal or no choroidal involvement and/or prelaminar or no optic nerve involvement	-	-	-	-	70	100%
Intermediate Risk	Massive choroidal invasion (C2), Scleral invasion without extraocular disease (S1), Postlaminar optic nerve infiltration PLONI, N2)	42	100 %	35	100 %	52	100 %
High Risk	Transscleral growth S2 Infiltration of resection margin of optic nerve N3	6	80 %	-	-	1	100 %
