Table-4: Risk stratification at baseline and after 7 days of steroid

Risk	Distribution (at presentation)	No. of poor steroid responder	Re risk stratification based on D8 response *
Standard risk	21(30.8%)	0	21
Intermediate	43(63.2%)	1	42
High risk**	4(5.88%)	0	5

*1 intermediate risk patient had poor response so reclassified as high risk.
**High risk remains high risk irrespective of D8 steroid response
